A Practical Serials Walkthrough

Presented by Erica Rohlfs, Education Librarian, Equinox Software 2014 Evergreen Conference (March 21, 2014)

Serials

- Serials Module actions are located within the bibliographic records
- MFHD (MARC Format for Holdings Data) describe the library's holdings in a single statement
 - Within the bibliographic record → Actions for this Record → MFHD Holdings → Add MFHD Record
 - Within the bibliographic record → Actions for this Record → MFHD Holdings → Edit MFHD Record
 - Within the bibliographic record → Actions for this Record → MFHD Holdings → Delete MFHD Record

- 852b (sublocation/collection) automatically fills in
- Add 866 868 info
- When you click Save MFHD, wait a few moments then just close out the window

Library Setting OPAC: Use Fully Compressed Serial Holdings set to True

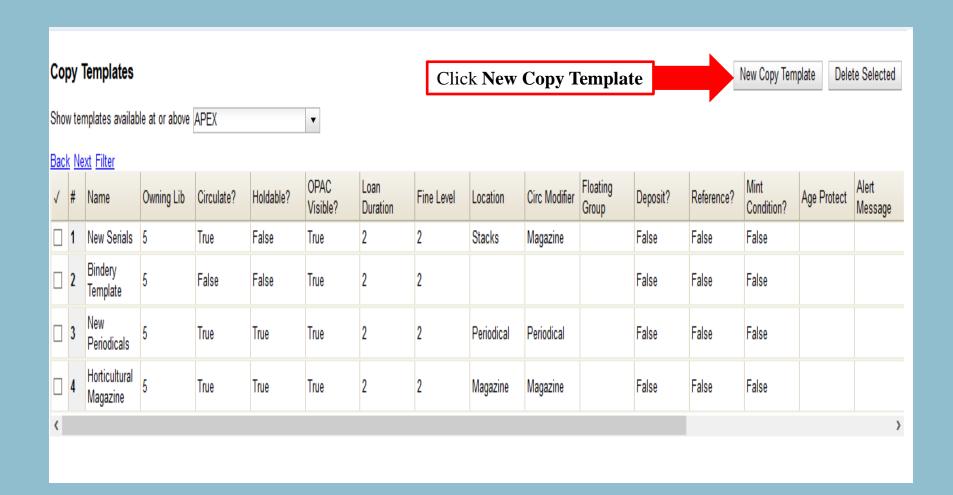

- Does not play together with MFHD https://bugs.launchpad.net/evergreen/+bug/963341
- Preferable to some, because it sorts newest to oldest

Copy Template Editor

- Admin → Local Administration → Copy Template Editor
- Create common parameters for the serials you receive or bind
- Can be used in conjunction with Library Setting: Previous Issuance Copy Location
- If a Copy Template is used by a distribution, then it cannot be deleted until the distribution it's attached to is deleted
- Permission: Admin_Asset_Copy_Template
- Not to be confused with the Item Attribute Editor

Create a Copy Template

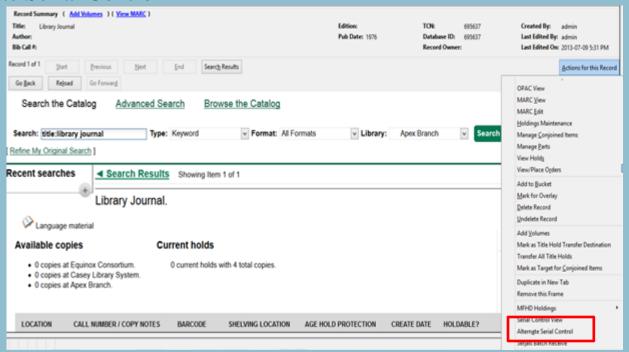

Copy Templates

Copy Templat	es

Cancel	Save					

Alternate Serial Control View (ASCV)

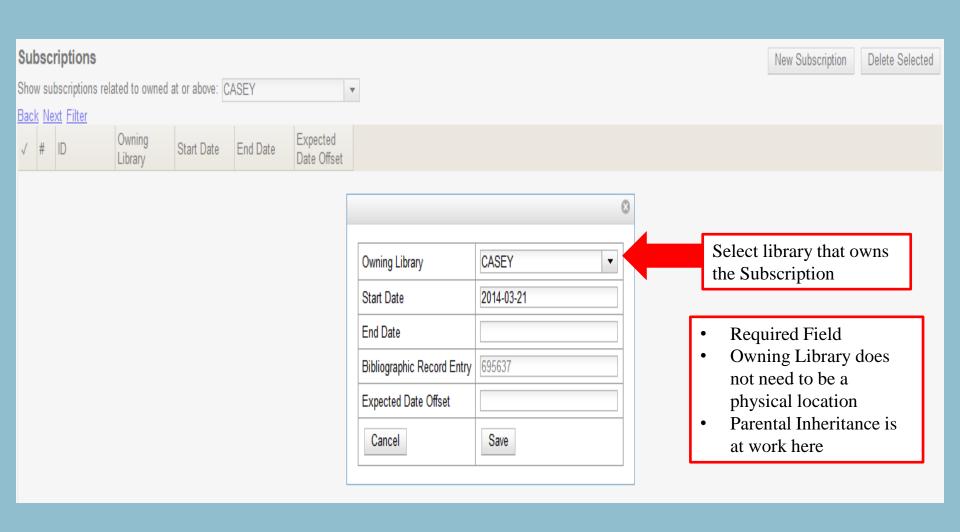

• Within the bibliographic record for the serial → Actions for this Record → Alternate Serial Control

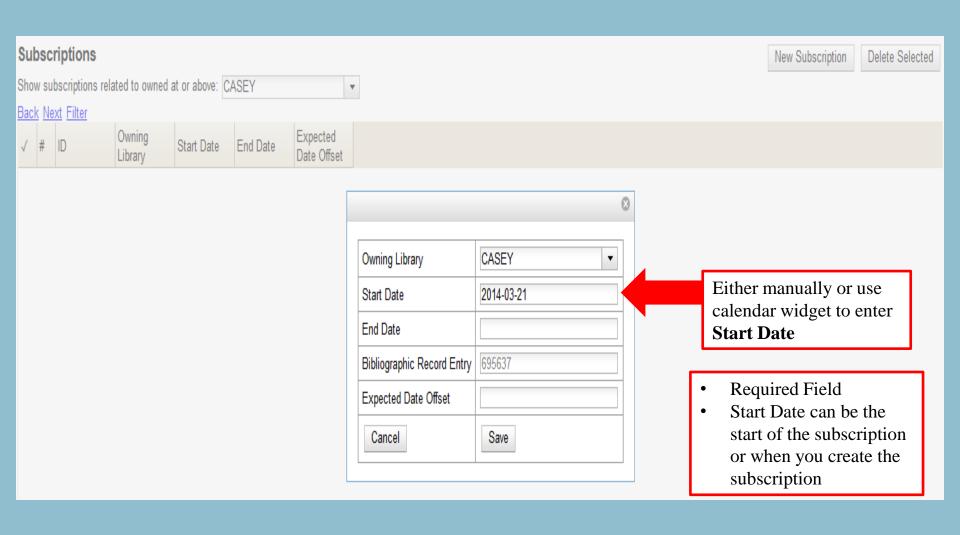

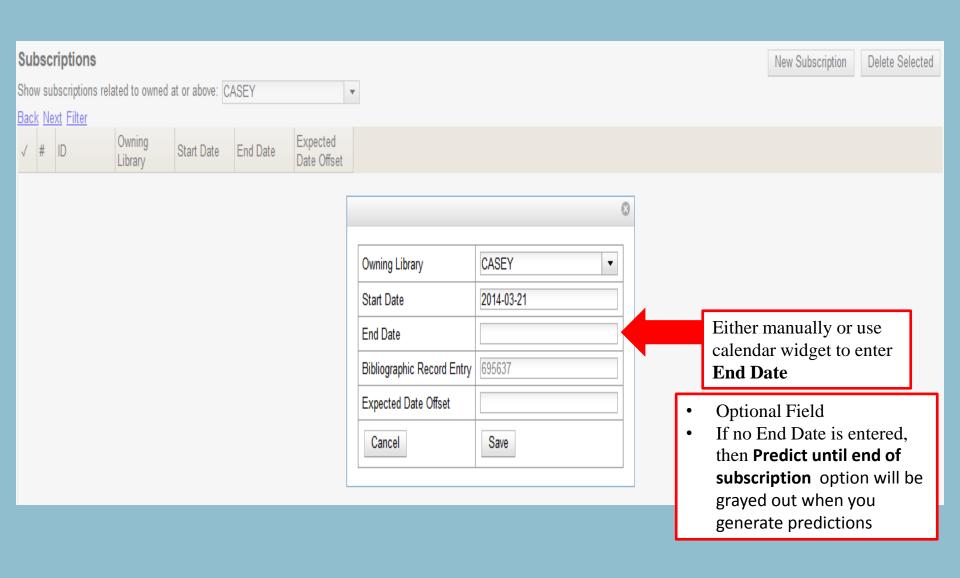

• In this walkthrough, we will look at setting up one subscription at the system level and create distributions for each branch. We will receive centrally. However, Evergreen is not limited to just this workflow. Many libraries create subscriptions for each branch and/or allow branch-level receiving.

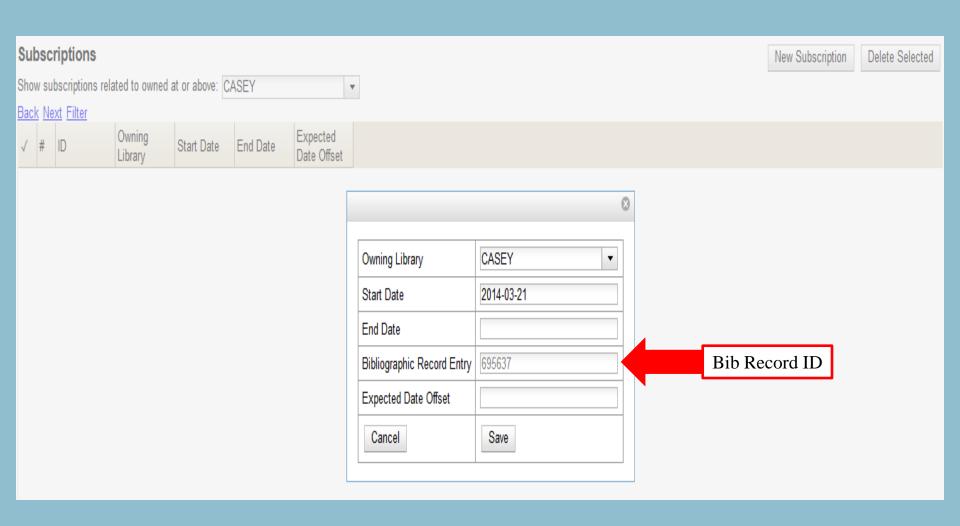

ASCV

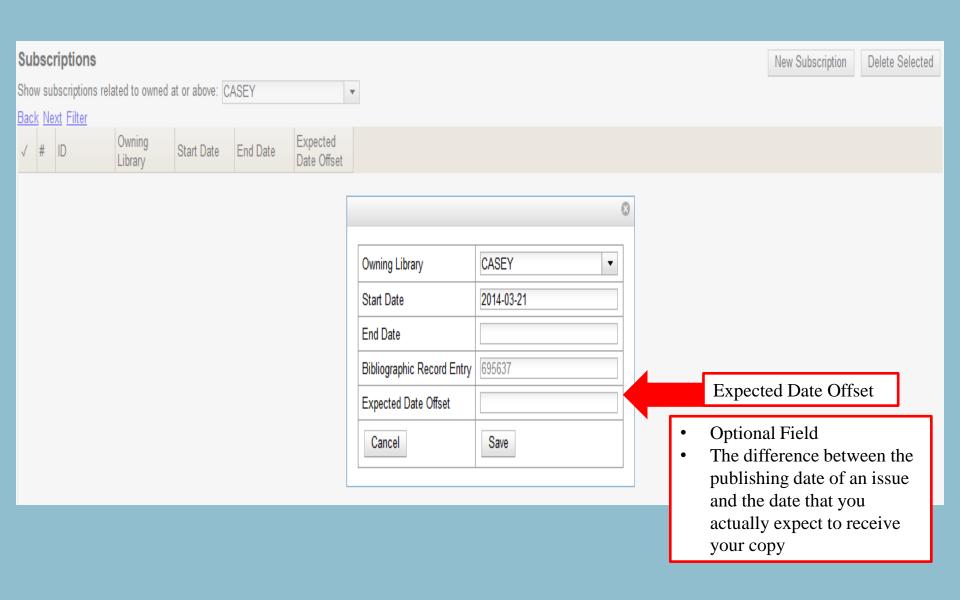

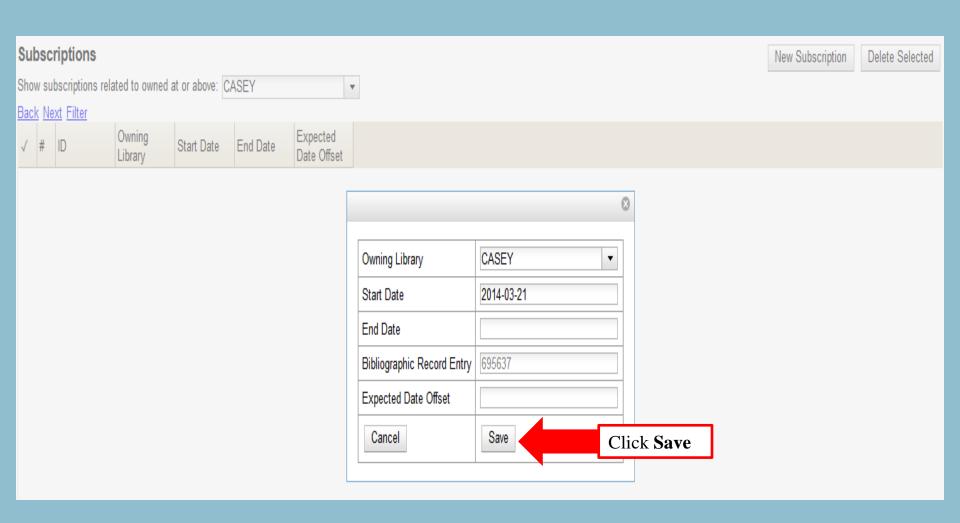

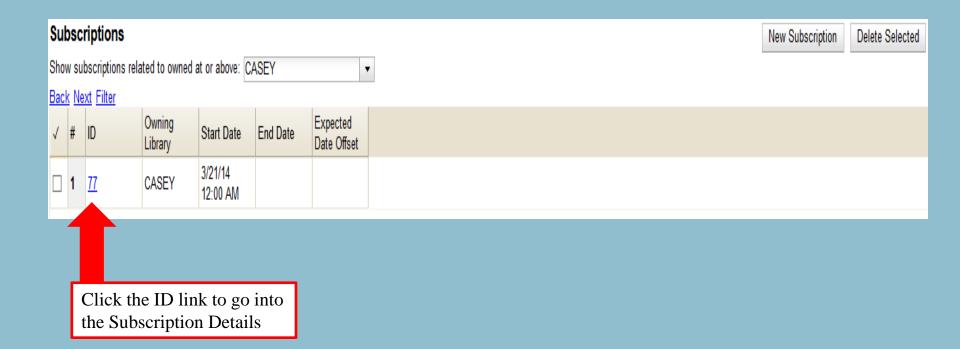

ASCV: Subscriptions

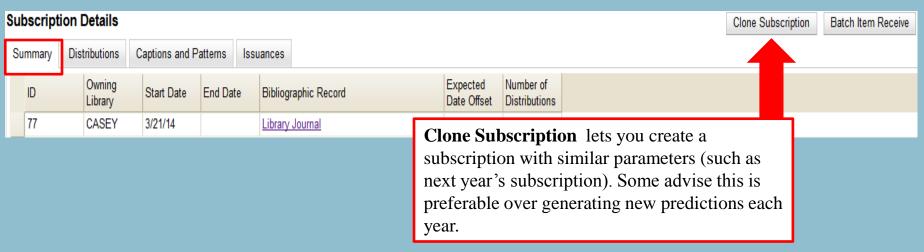

Summary Tab

Clicking on the Bibliographic Record link will take you back into the Subscription screen

Summary Tab

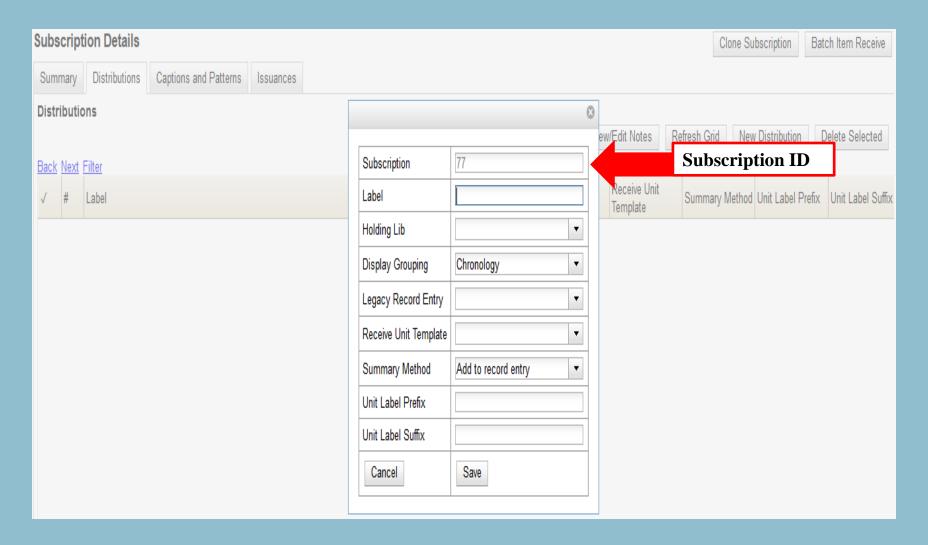

Summary Tab

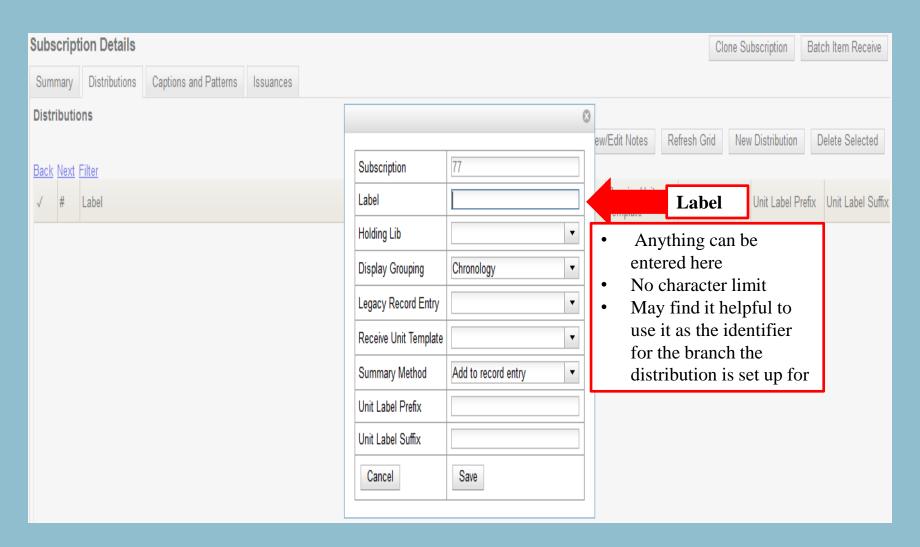

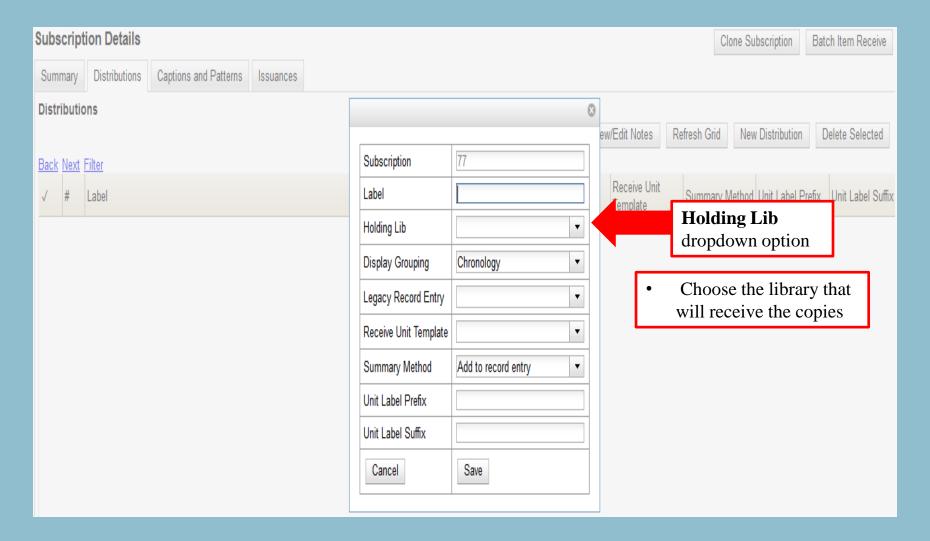

Distributions Tab

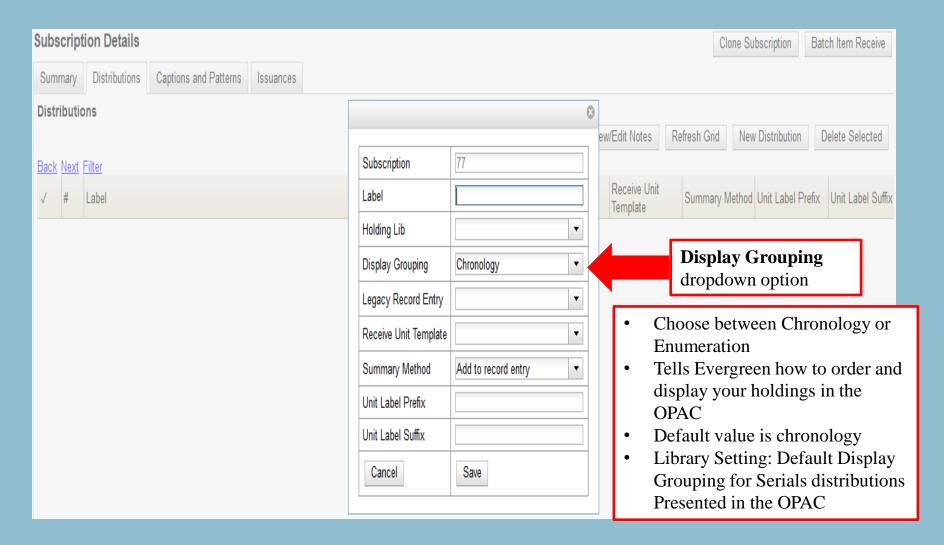

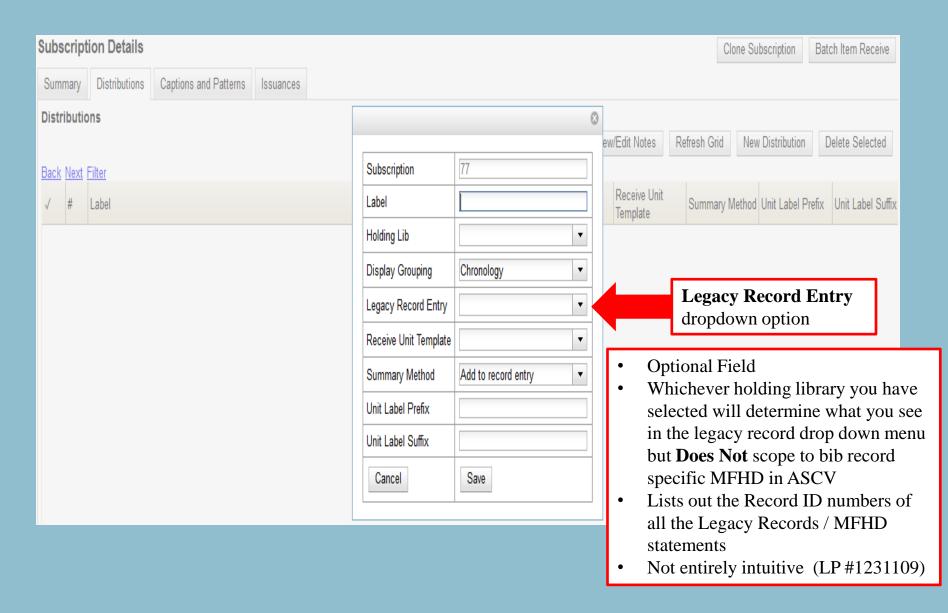

Distributions tell Evergreen which branches will receive copies

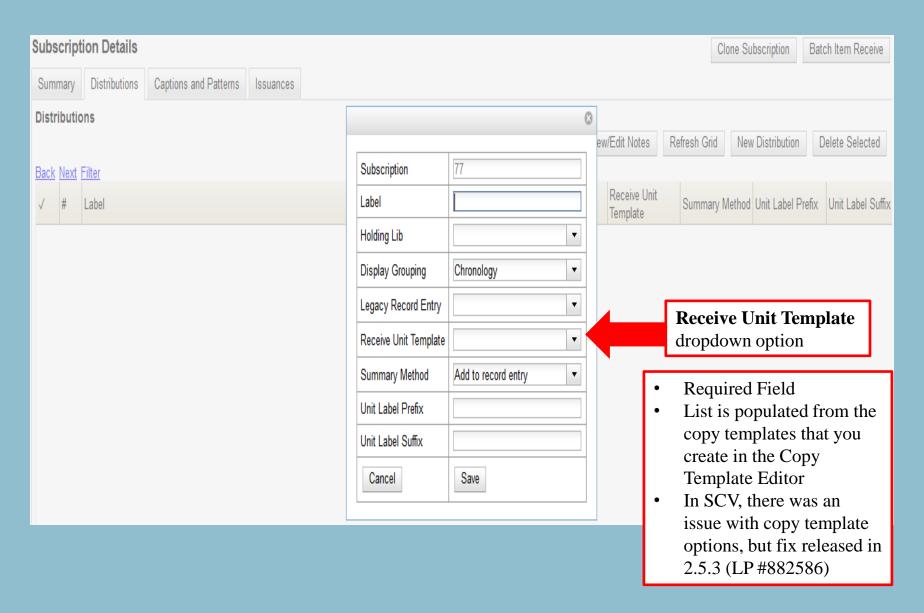

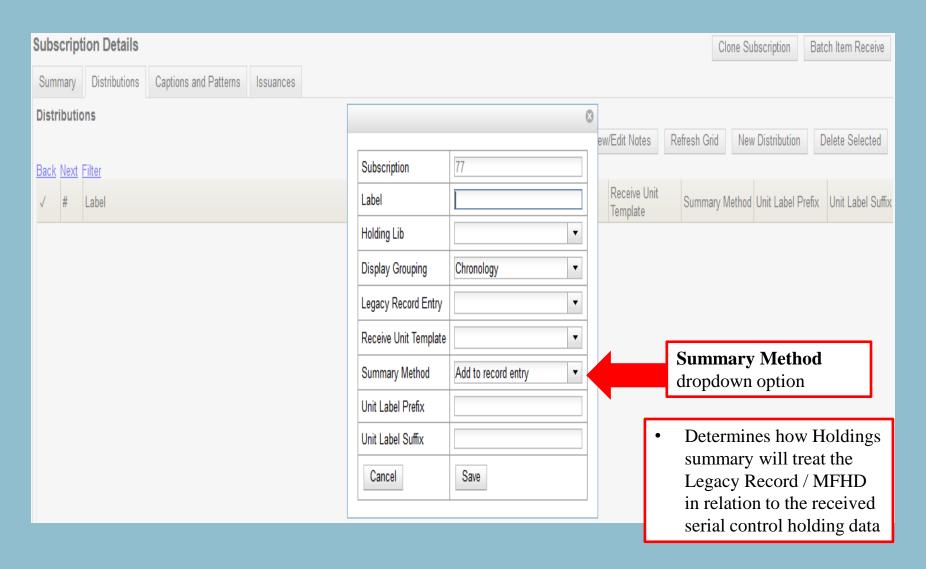

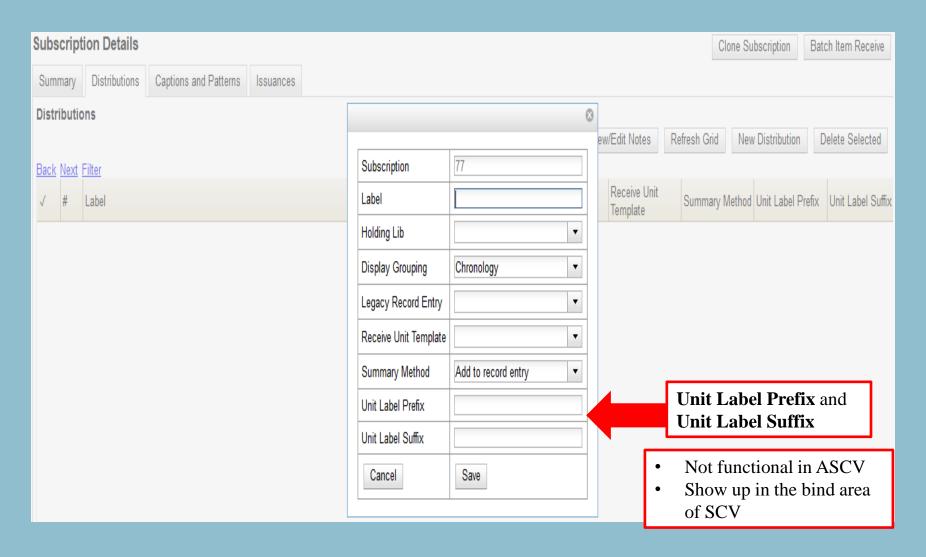

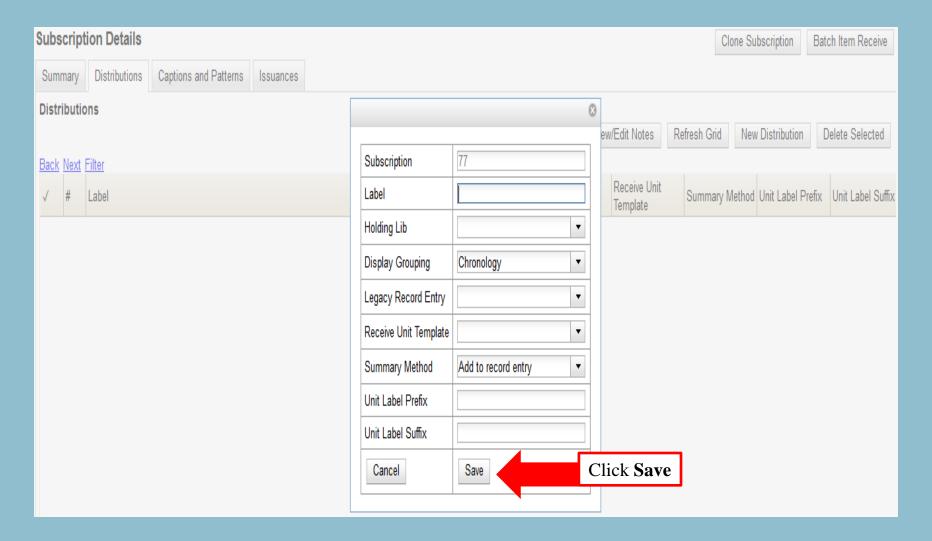

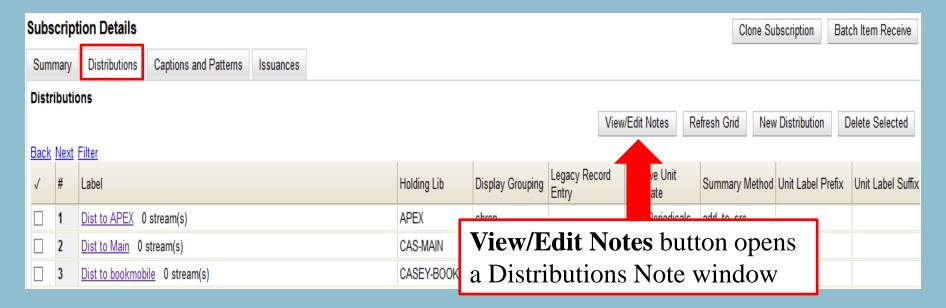

Summary Method

- 1. Add to Record Entry displays the two holding summaries next to each other. Will display the MFHD holdings summary first, followed by the summary generated from the serial control received issues.
- 2. Merge with Record Entry merges the 2 summaries into a single statement.
- 3. Use Record Entry Only displays the MFHD holding summary only.
- **4. Do Not Use Record Entry** displays the Evergreen generated holdings statement from the serial control received issues only.

Distributions Tab

Add/Edit Distribution Note

Add New Note		
	2044-02-47	n A
Send to Main branch	2014-03-17	Private 📇
↑ Edit This Note ↑ Delete This Note	Clo	se Window

Distributions Tab

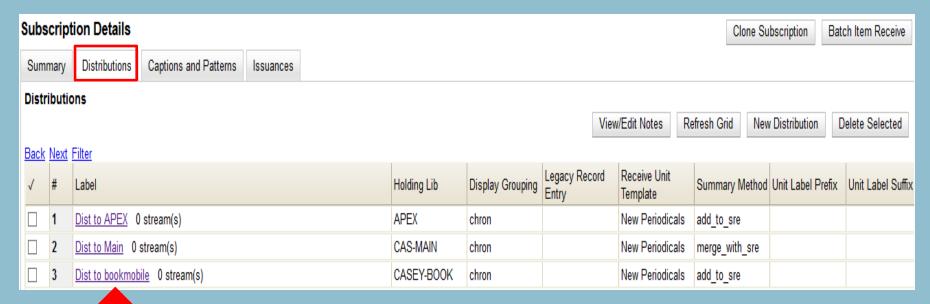

Once you create the distribution(s), you need to create the streams.

Please Note: in SCV, a stream is automatically created when you create a distribution

Distributions Tab

Create a Stream

Click on the Distribution Label link to access the Streams page

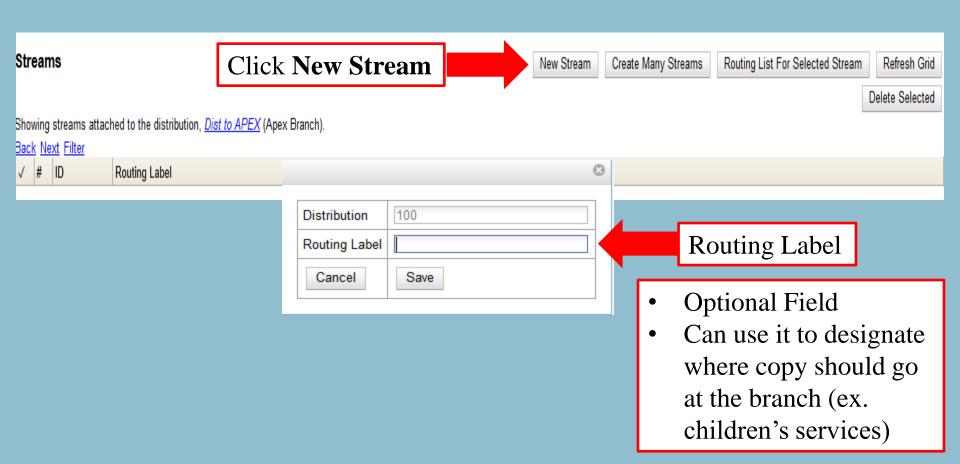

Create New Streams

- Streams work together with Distributions
- Distributions identify the branches that should receive copies
- Streams identify how many copies should be sent to each branch

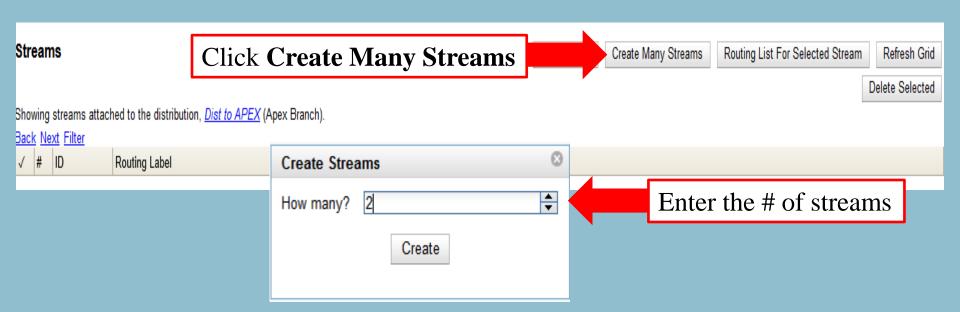

Create New Streams

- Streams work together with Distributions
- Distributions identify the branches that should receive copies
- Streams identify how many copies should be sent to each branch

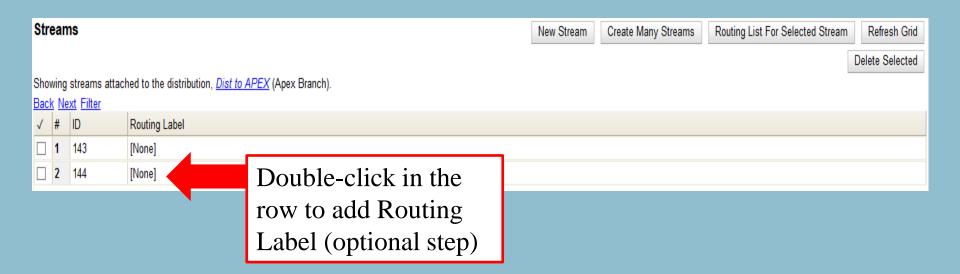

Create New Streams

- Streams work together with Distributions
- Distributions identify the branches that should receive copies
- Streams identify how many copies should be sent to each branch

Create Many Streams cont.

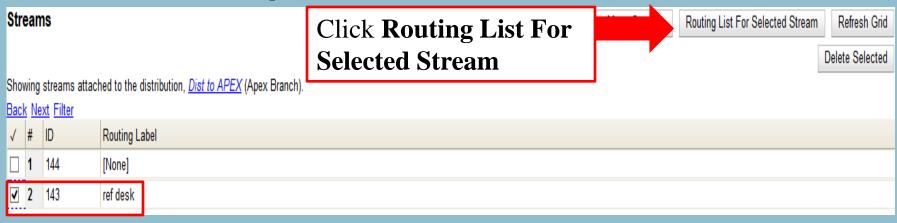

Create Many Streams cont.

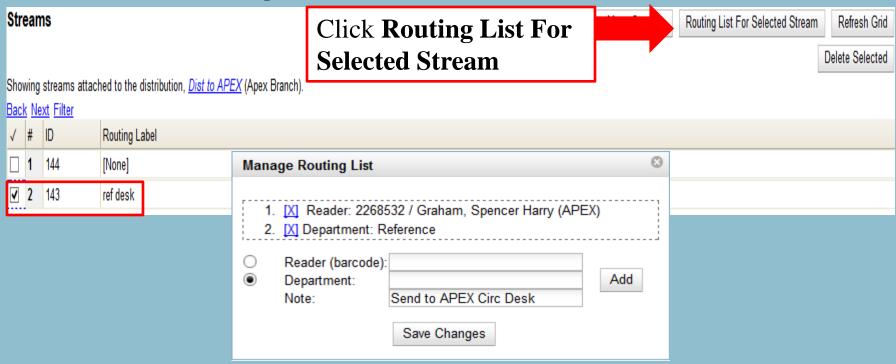

Streams

- Routing Lists are printable lists
- Add a reader (specific barcode) or add a department. To add multiple people and/or departments, click Add. You can also add a note.
- Routing List print automatically when you receive in SCV
- Good For homebound patron lists

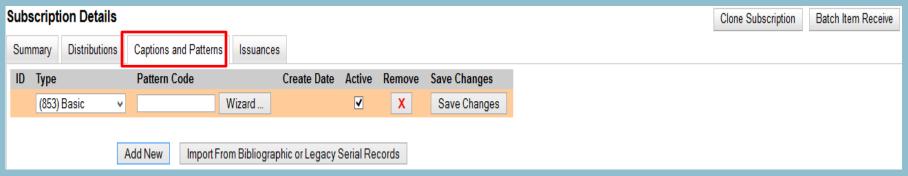

Streams

- Routing Lists are printable and can include user's address
- Add a reader (specific barcode) or add a department. To add multiple people and/or departments, click Add. You can also add a note.
- Routing List print automatically when you receive in SCV
- Good for homebound patron lists

ASCV: Subscription Details

Captions and Patterns Tab

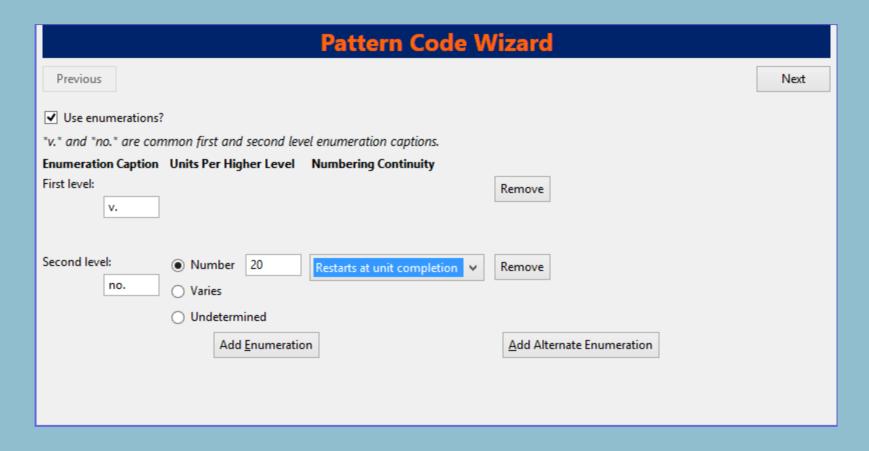

Captions and Patterns wizard enables you to enter caption and pattern data as it is described by MARC 853, 854, and 855.

Define how issues will be captioned and how often the library receives issues of the serial.
