Record: 4 of 15

Did I put a
request in for...?

We added notes.

Lots and lots of
notes.

The image shows a screenshot of a software application window titled "Add Note". The window contains a "New Note" section with the following fields and controls:

- Patron Visible?**: A checkbox that is currently unchecked.
- Title**: A text input field containing the text "PR-TITLE".
- Note**: A text area containing the text "Author" and "Format" on separate lines.
- Initials**: A text input field containing the text "TT".

At the bottom of the dialog, there are two buttons: "Cancel" and "Add Note".

What next?

Compared the Access Database to Evergreen.

Added to Baker & Taylor Carts.

Added notes to the database indicating status.

Weekly we checked Evergreen for when the titles showed in the system.

Once the item was in the system, we placed holds and updated the Access Database.

The glitches...

You cannot select pick-up library until after you have created the request.

Sorting from the Patron Request screen is difficult.

You cannot see the patron's information unless you add the patron barcode to the Other field.

Duplicate Holds.

No easy way to see who should be billed for the purchase request.

The Acquisition Request Module was not ported over completely in the Web Client before v3.2.

No way to easily see if requests are fulfilled and no way to easily clear old requests.

Links to requests from purchase orders do not work.

How it works in 3.2

Thanks to PaILS and
Evergreen Indiana

Easier to Navigate Patron Requests Screen
